

THE ATLANTA ASTRONOMY CLUB

January 11, 1980

MEETING NOTICE

The Atlanta Astronomy Club's first meeting of the 1980's will be held on Friday, January 18, at 8:00 P.M. in Bradley Observatory at Agnes Scott College. Tom Buchanan, who has been a club member for over a year, will speak on *Photographic Spectroscopy with Portable Equipment*. His research has produced spectrograms of stars and light pollution, and has included studies of the flash spectrum of the sun's chromosphere.

NOTES

Anyone who would like to buy, sell or trade equipment or other astronomy materials can advertise in the newsletter. Please contact me at 636-4796 or send a letter.

Also feel free to contribute any news-worthy items of interest to the club, or personal-interest items.

TELESCOPE WANTED

John Koch is looking for a 'scope of 6-inches aperture or less. Call 469-0629.

MARK YOUR CALENDAR

New moon is on the 17th, so the weekend of the meeting will be the best time to observe this month. Take advantage of our Villa Rica viewing site!
